Regina Bowen Hines, MSN, RN, VA-BC

Catheter and Bundle: Is Your Team Complete?

The program's learning objectives are as follows:

- 1. Discuss what the current evidence tells clinicians and where the gaps exist*
- 2. Describe the science behind why vascular catheters continue to become infected and the "loop holes" that allow that to happen*
- 3. Identify the differences between active and passive protection of a catheter surface*
- 4. Explore the role of technology in the next evolution of catheter protection*

1 hour CEU available - BRN # 03947 (see attached flyer for objectives)

Lunch and speaker generously sponsored by **Teleflex**

Spreading knowledge. Preventing infection.™
